An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Wei Te Chung on February 12, 2004.

The application has been amended as follows:

Claims 2-11 and 13-15 have been canceled.

Claim 1, last line, the period has been changed to a semicolon and the following paragraphs have been inserted thereafter:

-- wherein the passage deflects the contacting portion to provide a downward force on the contact;

wherein the housing includes two barriers projecting inwardly from the mating face into the receiving cavity, the ramps essentially aligned with and spaced from corresponding barriers in a front-to-rear direction, the slot extending between the barriers;

wherein the contact further includes a transition bight and a tail portion integrally attached to the base portion by a transition bight;

wherein the housing has a groove far from the front mating face, and wherein the tail portion of the contact includes a positioner portion received in the groove;

wherein the base portion further has an enlarged section far from the front nose, the enlarged section extending transversely and outwardly, the transition bight integrally

Art Unit: 2833

extending from the enlarged section and interconnected between the base portion and the tail portion;

further including an insert module having a pinout therein, and wherein the contact extends into the pinout and electrically connects with the insert module;

further including a plastic rear cover attached to the housing with the insert module sandwiched therebetween;

wherein the plastic rear cover has a projection extending from a top end thereof, and wherein the housing defines a locking hole for receiving the projection;

wherein the plastic rear cover has a fixing portion, and wherein the housing includes a shaft projecting inwardly from a bottom portion thereof engaging with the fixing portion of the rear cover;

further including an outer shell affixed around the housing for electro Magnetic Interference (EMI) protection. --.

Claim 12, last line, the period has been changed to a semicolon and the following paragraphs have been inserted thereafter:

-- wherein said tail portion includes a large positioning section to interferentially retain the contact in the housing;

wherein the tail portion is mechanically and electrically connected to an internal printed circuit board;

wherein said internal printed circuit board is connected to the tail portion in a perpendicular manner. --.

Art Unit: 2833

The following is an examiner's statement of reasons for allowance: none of the prior art of record discloses or teaches all of the specifics of the housing, comb passage, ramps, contact, insert module, rear cover, and outer shell for EMI protection; nor the specifics of how the internal circuit board is connected to the contacts, in combination with the rest of the subject matter of the independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary F Paumen whose telephone number is 571-272-2013. The examiner can normally be reached on Monday-Thursday.
